

**FOR IMMEDIATE RELEASE: October 14, 2021**

**Avon Community Electricity Aggregation (CEA) program, offered by the Town of Avon and launched in July 2019, will continue for another three years**

Avon, MA – The town of Avon announces that it will continue its electricity aggregation program for another 3 years, between December 2021 and December 2024. Those who already participate in the program – and that’s most of Avon residents and small businesses – **don’t need to do anything to continue their participation.** Those who have not been part of Avon CEA, can read more about the program on the program website Avon-CEA.com.

“We’re excited to renew the electricity program for another three years with stable, fixed rates,” said Gregory Enos, Avon’s Town Administrator. “The program will continue to provide benefits to our community for years to come.”\*

Avon CEA, which will continue with electricity supplier Dynegy, offers two different products: a default option and a 100% renewable electricity option for those who want to invest more in renewable energy. The table below shows the new Avon CEA rates.

National Grid	Avon Community Electricity Aggregation	
<b>Basic Service (Residential customers)</b>	<b>Avon Standard</b>	<b>Avon Green 100%</b>
\$0.14821/kWh	\$0.10202/kWh	\$0.14095/kWh
Meets MA renewable energy requirements	Meets MA renewable energy requirements	100% in addition to MA renewable energy requirements
<b>Duration</b> November 2021- April 2022	<b>Duration: December 2021 - December 2024</b> Products described as <b>Green</b> contain additional Renewable Energy Certificates (RECs) above that required by MA law. The additional RECs qualify for MA Class I designation from generation located within, or delivered to, New England.	

**\*Disclaimer: Savings cannot be guaranteed** as compared to National Grid’s Basic Service rates which change every six months for residential and commercial accounts and every three months for industrial accounts.

Current Avon residents and businesses who are participating in the Avon CEA program will be automatically transitioned to the new default electricity rate as of their November 2021 meter read date. Those participating in the program will see Dynegy – Avon listed as their Supplier in the Supply Services section of their National Grid utility bill.

The Avon CEA program is part of a larger movement in Massachusetts to provide more local control and electricity choices to residents and small businesses: over 160 Massachusetts cities and towns have an electricity aggregation program.
